Proper Cleaning of Drain and Fill Whirlpools

1. Drain the tub completely.

2. Fill with water at least 110 degrees F. to 2” above the highest jet.

3. Add 1/4 cup or 2 oz. of a low sudsing automatic dishwasher detergent and run the jets for 5 - 10 minutes.

4. Drain the tub completely.

5. Refill the tub with cool water. Add 1 ounce of household bleach per 4 gallons of water. If you are not sure of the capacity, 4 ounces should be sufficient. Run the jets for another 5-10 minutes.

6. Drain the tub completely and wipe dry with a clean soft cloth towel.

The most important point is to circulate detergent and bleach throughout the piping system because this is where bacteria and pathogens will most likely grow.
