Nursing is Normal

A traveling photography exhibit that supports and encourages breastfeeding families.

The Polk County Breastfeeding Coalition strives to create a culture where moms feel comfortable breastfeeding their babies wherever they are.

In 2009, the display was created to spread the message that nursing is normal and it is normal to breastfeed in public.

In 2017, the coalition wanted to expand this message by showing women thriving in their many roles while breastfeeding. Women need to see other women work, play and socialize all while continuing to breastfeed.
